

CWD Initial / Physical Animal Inspection

Inspection Type: <input type="checkbox"/> Initial <input type="checkbox"/> Physical (every three years) <input type="checkbox"/> Compliance

Premises Name	Physical Location of the Herd (descriptive or GPS)	Region	County / FIPS
---------------	--	--------	---------------

TAHC Number (PIN or LID, if assigned)	CWD Herd Number	Status	TPWD Facility ID
---------------------------------------	-----------------	--------	------------------

Owner Name	Owner Phone	Owner Address	Owner Email Address
------------	-------------	---------------	---------------------

Manager Name	Manager Phone	Manager Address	Manager Email Address
--------------	---------------	-----------------	-----------------------

Change of Address/Phone Number

Species	Date of Previous Inventory	Enrollment Date	Inventory Verification Date
---------	----------------------------	-----------------	-----------------------------

Inventory (12 months or older)

Number Total Inventory	Number Incoming Transfers	Number Outgoing Transfers
------------------------	---------------------------	---------------------------

Eligible Mortalities (12 months or older)

Number "Not Detected" Test Results	Number Inconclusive Test Results	Number Not Tested	Total Number of Mortalities
------------------------------------	----------------------------------	-------------------	-----------------------------

Certification: I have visually inspected this herd and certify that the herd complies with TAHC CWD Herd Certification Program standards as follows:

All Inspections:

Yes	No	
		This annual inspection of a cervid breeding facility was conducted by a TAHC representative or a TAHC Authorized Veterinarian 11 to 13 months after the last inspection.
		The herd was visually observed for clinical signs of CWD.
		Records were reviewed for completeness and accuracy.
		The previous year's inventory was reconciled as well as all documented dispositions and acquisitions.
		The herd owner's records were reviewed and reconciled with the overall head count; any discrepancies were documented.
		The CWD sampling requirements were verified to have been met; any deficient, missed or poor-quality samples were documented.
		Perimeter fencing was inspected for minimum standards and needed repairs and was documented.

Initial Inspection only:

Yes	No	
		Two unique animal identification numbers for each individual animal (one official ID, one unique to the herd) were verified and recorded. All required identification devices were visually verified and reconciled with the herd owner's records.
		The herd inspection was performed not more than 60 days prior to the herd's date of enrollment.

Physical Inspection only:

Yes	No	
		All required identification was visually verified on 100% of the animals.

Signature of Authorized and Accredited Veterinarian/TAHC or USDA Employee	Veterinarian Accreditation Number	Date
